The third and longest part of the volume, "State and Society," surveys the political structure and main themes in political history of distinct regions in a generally chronological framework. Part 5, "Politics and the State," returns to political history, this time considering themes from an international angle. While lauding the new cultural history's focus on individual experience and perception, "discourse," gender, identity, and non-elite cultural practice, Wilson notes the potential, if unintended, consequences of such paradigms as "Atlantic world" and "public sphere" to reduce European history to that of its northwestern corner and its urban middle classes.

Edited by Peter Wilson, a distinguished political and social historian of European history, Blackwell Publishers, Oxford, United Kingdom. Anthoula Malkopoulou.
