Figure 1. There is information supporting that this may happens for at least five generations. Stressquestionnairesandstressbiomarkersduringpregnancy. One would have expected an outcry not just in Washington but nationally about this pregnant woman being so savagely beaten by the baby's father, trying to force her to have an abortion. Once women are in treatment, counselors need to ensure that

they are provided with or referred for medical and prenatal care as soon as possible to prevent medical complications. Research from Zimbabwe has shown that the use of fear by parents arises from concern. For example, a consequence of excessive alcohol use is liver damage such as cirrhosis that often begins earlier in women consuming less alcohol over a shorter period of time.
