Embracing innovation: the electric bicycle and shared bike schemes As China continues to urbanise, commuters need new forms of transport. They have met the public need for both speed and convenience.

Number of people that are seriously injured in road accidents divided by population. Convergence of traffic at major highways that serve vast low density areas with high levels of automobile ownership and low levels of automobile occupancy. Hickman and Banister [19] studied a backcasting approach to develop alternative scenarios related to different policy measures. We can affirm that an high value of sustainability is associated, in general, to small-medium cities in term both Sustainable Transport: 200 (Issues) and urban area; nevertheless, for large cities, the adoption of policy measures, from a side, to control the urban sprawl, from the other side, to manage the urban transport demand with an adequate public transport

development allows to achieve a more sustainable mobility.
Average costs for mobility solutions in Beijing – The graph shows the average
on a sustainable path in
